

Set up Sortd

iOS 27

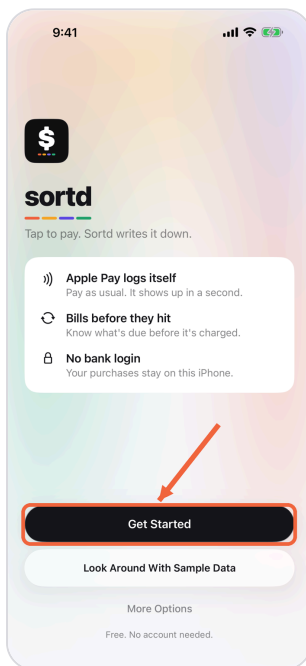

Part 2A

10 steps · about 1 minute

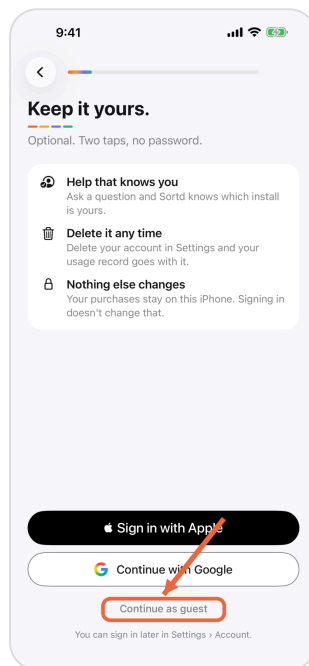

Not sure? Open **Settings** > **General** > **About** and look at **iOS Version**.

Part 1 Get Sortd

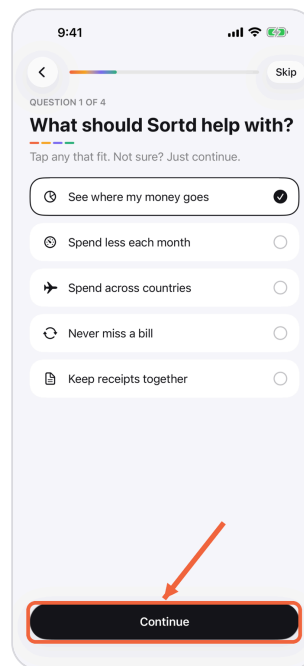

1. On your iPhone, open the **TestFlight** link from your Sortd email.
2. If it asks, install **TestFlight** from the App Store. It's free and made by Apple. Then open the link again.
3. Tap **Accept**, then **Install**. Open **Sortd** and follow its screens:

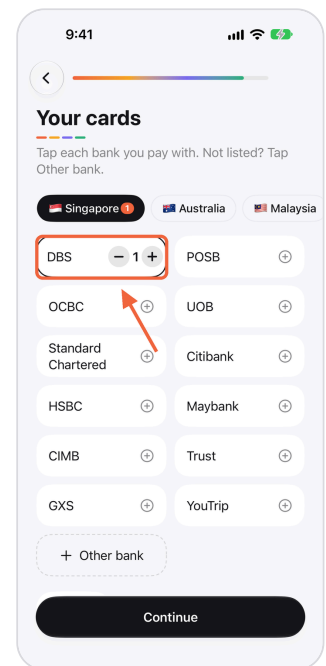

Tap **Get Started**

Sign in, or **Continue as guest**

Answer 4 quick questions

Tap the banks you pay with

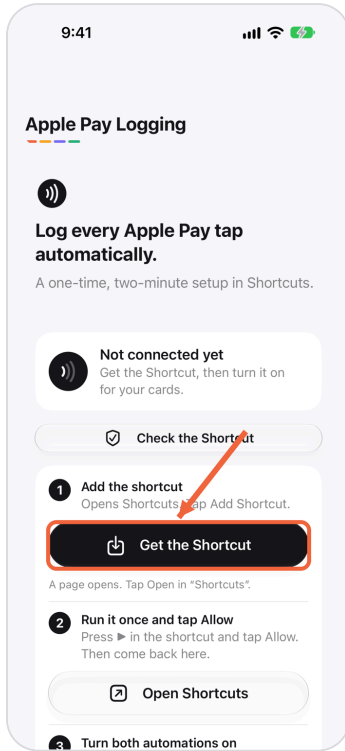

When Sortd shows **Log Apple Pay by itself**, turn to **Part 2A** (iOS 27).

Apple Pay logging on iOS 27

1

Tap Get the Shortcut

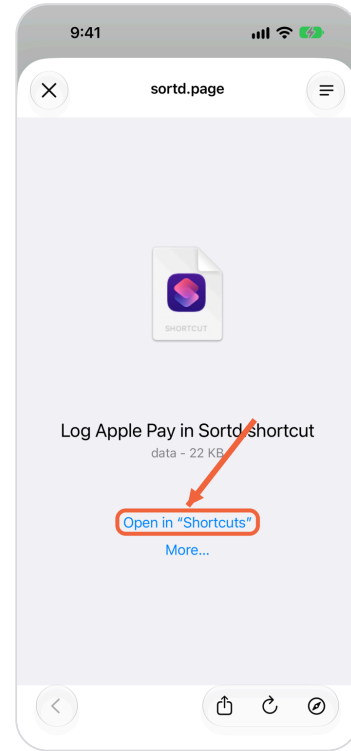

On Sortd's **Log Apple Pay by itself** screen.

2

Tap Open in "Shortcuts"

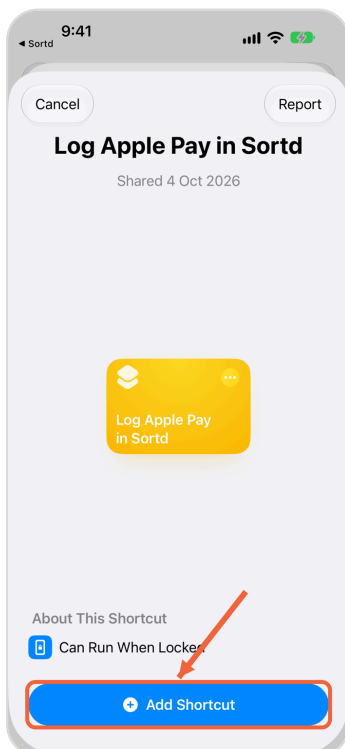

A page opens with the shortcut file.

3

Tap Add Shortcut

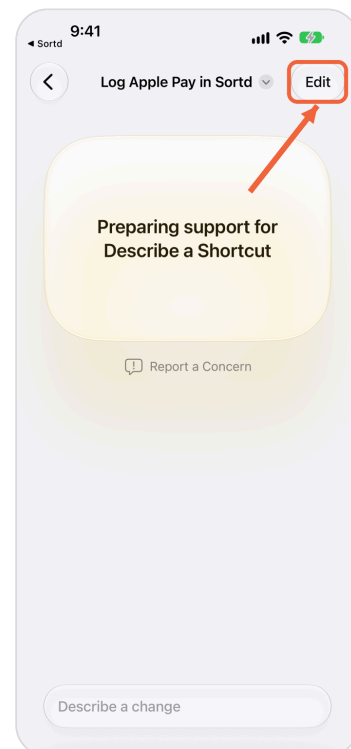

The blue button at the bottom.

4

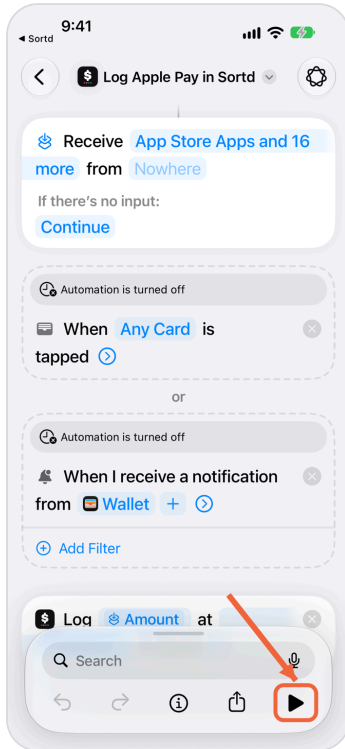

Tap Edit

If you see **Describe a Shortcut**, tap **Edit** at the top right.

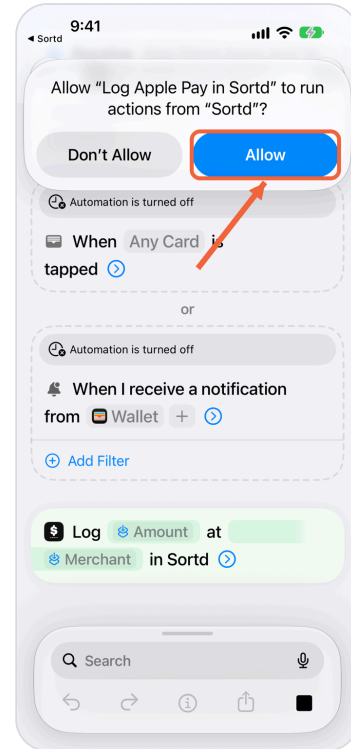

Apple Pay logging on iOS 27

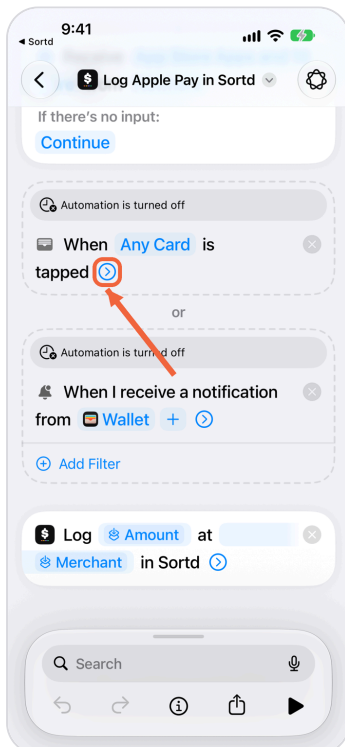

- 5 Tap ► to run it once**
Bottom right of the screen.

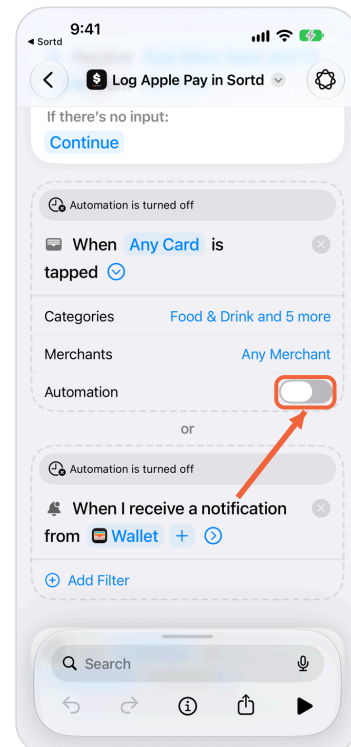

- 6 Tap Allow**
This lets the shortcut send your taps to Sortd.

- 7 Tap > next to "tapped"**
On the **When Any Card is tapped** line.

- 8 Switch on Automation**
"Automation is turned off" goes away. Leave **Notify** off.

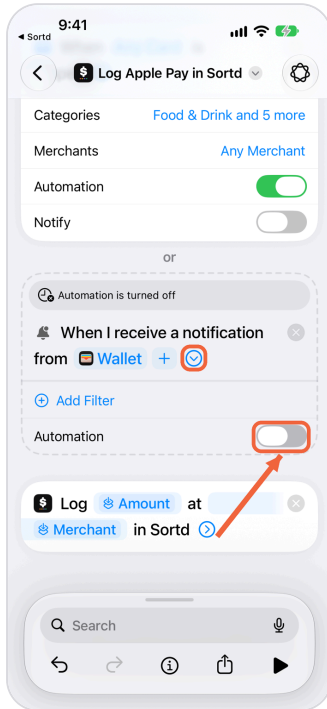

Apple Pay logging on iOS 27

9

Do the same for Wallet

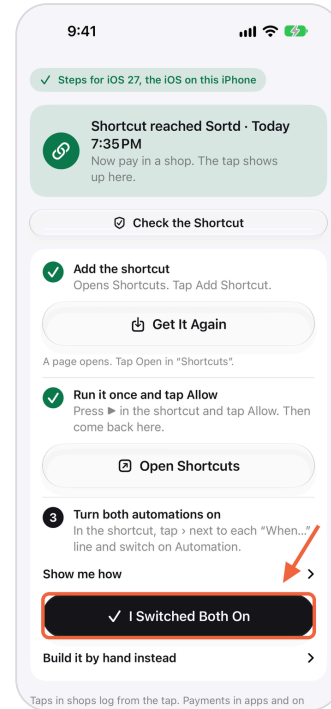

Tap > on **When I receive a notification from Wallet**, then switch on **Automation**. This logs Apple Pay in apps and on websites.

10

Back in Sortd, tap I Switched Both On

It is under step 3. Then tap **Continue**.

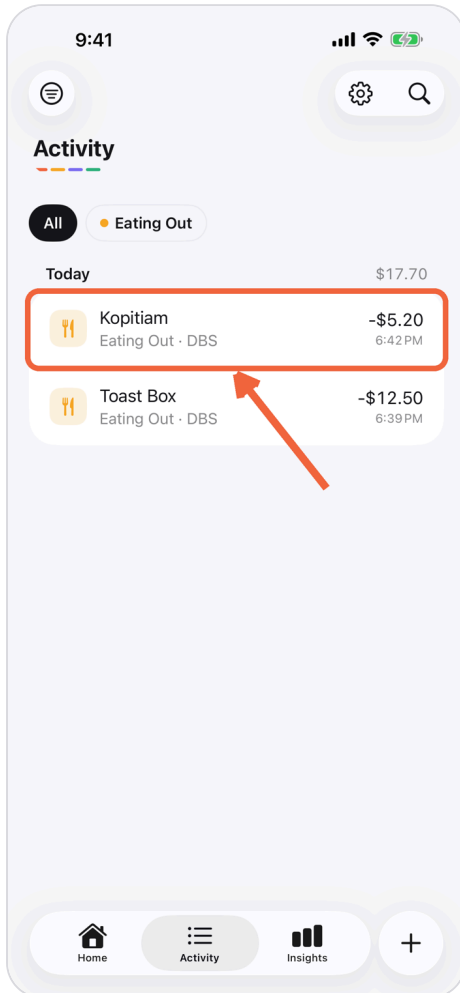

Check it works

Pay with Apple Pay in a shop

Open Sortd and tap **Activity**. The purchase is already there. The ► button in Shortcuts doesn't test this.

Example: S\$5.20 at Kopitiam

Sortd says it worked

⚙️ > **Purchase Sources** > **Apple Pay Logging**
shows **Last tap logged**.

Last tap logged · Today 6:42 PM
\$5.20 at Kopitiam

Good to know

- **Apps and websites:** on iOS 27 these log from Wallet's notification. On iOS 26, add them with + in Sortd.
- **iOS 26, paid and nothing showed up:** open the automation in Shortcuts. Amount, Shop and Card must each say **Shortcut Input**, and **Run Immediately** must be ticked.
- **Cash, or anything missed:** tap + in Sortd.
- **Now and then** Apple's trigger misses a tap, mostly at vending machines, transport gates and parking.
- **Help:** sortd.page/support
